

16-824 Visual Learning and Recognition (F24)

Instructor: Jun-Yan Zhu

TAs: Hsu-kuang Chiu, M. Yunus Seker

Presentation instructions

5 minutes presentation + 2 minute Q&A

Dates: Monday 12/02 and Wednesday 12/04

Location: Classroom

Please fill out this [spreadsheet](#) to sign up for Monday or Wednesday and add a link to your slides BEFORE your presentation. Please make sure that your slides link (and video links) can be viewed by the instructor's or TA's laptop.

There are 9 slots available each day. This will make sure that each team has exactly 7 minutes (5 min talk +2 min Q & A) for its project. Please do not create additional slots for either day.

For the project presentation sessions, we will prepare snacks and soft drinks. We will also give out a small gift to the Audience's Choice Award according to student's live votes.

Final project report instructions (due: 12/11)

Writeup: please use the [CVPR template](#), 3-6 pages, excluding references. Your reports will be made publicly available on the course websites, so do not include confidential information.

In your report, make sure to motivate your project, describe your approach, and show interesting (qualitative or quantitative) results!

Submit to Gradescope:

- PDF of paper
- Project code

If you are working on video-related projects, you are encouraged to add video results to your PDF (providing a link) or website, if it helps demonstrate your method.

The deadline is strict (with no extension), as we need to submit the final grades before the semester ends.

Thank you!
